AR	05174395AA	MOPAR Satin Select Interior Treatment

Stick with the Specialists™

DISCUSSION:

All Chrysler, Dodge, and Jeep vehicles are designed with a low gloss interior trim. This low gloss finish maintains pleasing aesthetics, as well as to minimize glare of the instrument panel into the windshield. This low gloss finish should not be altered with a medium or high gloss interior treatment solution such as MOPAR Protector's or other Armor All-like products.

Instead, MOPAR Satin Select, p/n 05174395AA, which has been specifically developed to remove minor surface contamination and maintain the low gloss appearance should be used for interior trim treatment.

To use MOPAR Satin Select low gloss finish to treat interior trim, shake the bottle prior to application. Spray on a clean, lint free towel or microfiber towel, and wipe while surface is cool. MOPAR Satin Select is safe for use on plastic, vinyl and leather and provides UV protection.
